

Zephyr wins Archiproducts Awards

We are proud to announce that **Zephyr**, designed by **Carlo Colombo**, has been awarded the prestigious **Archiproducts Design Award 2024**. This important recognition celebrates a project that combines the craftsmanship of glass with advanced technology, delivering lighting solutions with a high aesthetic and functional impact. Zephyr features a cylindrical diffuser made of hand-blown glass, crafted with a wavy texture that alternates between transparent and opaline stripes. This refined technique not only enhances the diffuser's aesthetic appeal but also ensures a soft, glare-free light diffusion along the entire cylinder, improving visual comfort.

Carlo Colombo

With Zephyr, Artemide reinterprets the classic chandelier in a contemporary way, merging artisanal tradition with modern functionality. The textured glass is not merely a decorative element but a medium that amplifies and diffuses light optimally, enhancing any space it illuminates. This recognition underscores our commitment to forward-thinking design that meets architectural and environmental well-being needs.

Zephyr - Carlo Colombo

Zephyr is a concrete example of how Artemide combines elegance, innovation, and sustainability, enhancing the quality of spaces through light.
