Turn Around + Vector - Carlotta de Bevilacqua

The Egyptian Museum has begun a process of innovation and transformation to celebrate its bicentennial in the fall of 2024.

For this occasion, we renovated about 500 square meters distributed between the ground floor and the hypogeum, almost entirely illuminated with A.24 and Turn Around, which with its Vector 20 and 30, the smallest in Artemide's catalog, perfectly manages to illuminate the displayed elements without interfering with them.
